EDUCATION

Nanjing University	College o	ences Nanjing, Jiangsu							
Doctor of Philosophy	Optical Engineering	<i>Q.E.</i> − <i>Top 15%</i> □	Nonlinear Fourier Optics - 2025.06						
Dissertation: "Analytic 3D vector linear non-uniform & nonlinear Fourier crystal optics in arbitrary $\bar{\bar{\varepsilon}}, \bar{\bar{\chi}}$ dielectrics"									
Master 's Studies	Quantum Electronics	Courses Score – 93.5 🕠	THz OAM Source						
	Northeastern University School of Physics, College of Science Shenyang, Liaoning								
Northeastern Univer	rsity Scho	ol of Physics, College of Scie	Shenyang, Liaoning						
Northeastern University Bachelor of Science	rsity Scho Applied Physics	ol of Physics, College of Scie GPA Rank – 1/400	DDTank Aimbots – 2020.06						
Bachelor of Science	Applied Physics	GPA Rank − 1/400 👩	, ,						

Personal Projects

Managed to realize *tree*-print feature in CMD lines without knowing *any tree*-packages
in order to visualize run-time *Call Stack* with *buried checkpoints* & display *crucial info*to understand the *hierarchical structure* of my code from a more *abstract* perspective
Enabled *multi-threads* to accelerate *for loops* in python while preserving the *loops*' order
Implemented through utilizing the *producer-consumer model* (producer = thread pool)
Allow users to select which parts of the codes in the *for loops* to *parallelize* in CPU
Future model will move away from *python* as the primary language & shift to GPU
Favoring GPU is driven by "*fields* in physics = *arrays/matrices* in math/programs"
Haven't decided which to employ: CUDA, jax, webgl2, webGPU, mojo or bend?

Developed a log file system to track & record the operating status for debugging
to output script parameters (**kwargs) for rapid reproducibility of data in the future
to store data files & folders, and their metadata for swift data import and reutilization
Achieved automatic skipping of functions that return repeated values stored in memory
via @decorators: let precomputation assess whether to execute the decorated function
Wrap *matplotlib* into plot_1d(, _2d, _3d, .gif ...) for data visualization

DDTank Aimbots Analytic solution E(r) to $\left[(\nabla \times)^2 - k_0^2 \bar{\bar{\varepsilon}} \cdot \right] E(r) = 0$ where $\varepsilon_{ij} \in \mathbb{C}$ 2023.02 –
